

Invitation to workshop

“Planning for the 15-minute-city”

Teams 11 November 13.30-15.30 (UTC+1)

By Nordic Transition Partnership for Climate Neutral Cities 2030 (NTP)

The project Nordic Transition Partnership for Climate Neutral Cities 2030 (NTP), aims at accelerating the transition in small and medium sized municipalities to become climate neutral by 2030. We help municipalities to turn strategies into action and we want you to exchange experiences and join forces in new initiatives.

This is the first workshop of the NTP workshop series, where the different themes are results from several deep dive interviews held with Nordic municipalities facing similar challenges.

We hereby invite you to take part of, gain knowledge and maybe provide input to some defined challenges and solutions in the first workshop “Planning for the 15-minute-city”.

The workshop will provide 1-2 case examples within the theme and there will be interesting and fruitful discussions, take-aways and further collaboration opportunities for the participants.

There are limited number of participants so please make sure to secure your place by registering to this link already today: [LINK](#) You will receive a Teams-link prior to the workshop

Until then, please join our collaboration platform: Climate Neutral Cities 2030 (NTP) | Nordic Circular Arena for more information.

We look forward to meet you!
